

tranSMART 2018 Full Platform Release

The tranSMART 2018 full platform release will build on the [i2b2/tranSMART 18.1 beta release](#) and add back in the changes that were made to the [transmartApp](#) user interface in 16.3 and 16.2.

This will be the next full tranSMART Foundation Platform release in the Release 2018, with a working title of 16.4 for the code merge. The resulting tranSMART release will support both tranSMART and i2b2/tranSMART from a single code base.
