

# transmartApp

transmartApp has been the only tranSMART user interface for tranSMART up until the tranSMART 16.2 release.

With the developments leading to the [tranSMART 17.1 Server release](#) transmartApp has been upgraded to work with data as it was before, but it will not work with data using the new features: time series, samples and cross-study concepts.

Documentation:

- <http://transmart-app.readthedocs.io>

Code base:

- 16.2 and before: <https://github.com/transmart/transmartApp> or (for releases) <https://github.com/transmart-foundation/transmartApp>
- 17.1 and onwards: <https://github.com/thehyve/transmart-core/tree/master/transmartApp> (this link needs to be updated to the tranSMART /tranSMART Foundation repository once they are open.
